

Thank you for choosing a Meliconi remote control.

Keep this booklet for future reference

The Fully 8.1 remote control is designed to command up to **8** different devices of the following types: TV - SAT (satellite decoder) - TER (digital terrestrial decoder) - DVD (Dvd and Blu Ray) - PVR (Personal Video Recorder and Media Center) - CAB (cable TV) - ADSL (ADSL decoder) - AUX (other audio video equipments).

The MELICONI remote control reproduces infrared signals corresponding to the original; the functions that operate in radio frequency (e.g. voice commands and pointers) are not supported.

The remote control has a permanent memory, so it does not lose its settings even if there are no batteries in it.

#### SAFETY WARNINGS

The remote control and batteries should not be exposed to excessive heat such as sunlight, fire or the like.

The product **is not a toy**. Keep out of reach of children or domestic animals.

#### INSERTING THE BATTERIES

The remote control requires 2 new 1.5V **AAA/LR03** alkaline batteries, not included in the package. Insert with the correct polarity as shown in figure.

DO NOT use **rechargeable** batteries.

**BATTERIES TEST:** Press and hold the **5** button and check that the LED remains on continuously until the button is released. If the light is off or blinks, the inserted batteries are low, therefore they need replacement.

Do not leave exhausted batteries inserted, as liquid may leak and damage the remote control

#### SELECTION OF OPERATING MODE

#### WARNING:

As the remote control is capable of controlling 8 devices, during setup (and also during normal use), you must select the operation mode; then define which device you want to control. (TV / SAT / ecc.)

To select the operation mode for the first 4 devices, press for a moment one of the 4 device selection buttons at the top corresponding to the device you wish to operate (example: **TV**).

To operate with the 5 / 6 / 7 / 8 devices, keep the  key pressed and then press the relative key.

#### ACTIVATION OF REMOTE CONTROL

Before using the remote control, for each device you wish to control, it is **essential** to set a **specific code**, it matched. Identify the specific code and set it into the remote control using one of the following ways:

SMARTPHONE  
TABLET - WEB

MANUAL  
SEARCH

## SMARTPHONE - TABLET - WEB

Use the qr-code on the side or connect to the [www.cme.it](http://www.cme.it) page and follow the instructions. Once you have found the specific code for your device, set it in the remote control as described in the ENTERING THE CODE DIRECTLY chapter.

## MANUAL SEARCH

**ATTENTION:** searching for the suitable code could last up to 5 minutes.

- Stand in front of the device to be controlled and make sure it is ON (not in stand-by). If necessary, switch it on using the original remote control (if this is still working) or the buttons present on the device itself. (on TVs they can be on the side or the top)
- On the MELICONI remote control [select the operating mode](#) and then press and hold the  button until the LED of the remote control lights up; release.
- Pointing the remote control towards the device, PRESS AND HOLD the **ON/OFF**  button and wait (even up to 5 minutes) for the device to switch off.
- **PAY ATTENTION**, when the device turn off, **IMMEDIATELY RELEASE** the button.
- Three final flashes indicate that the operation has been completed successfully.

### VERIFY

Check that the MELICONI remote control operates your device in the main functions; if it does not, **REPEAT** the procedure.

**NOTE:** When the list of codes to be searched is over, the remote control exits the search and the LED remains off.

If no results are obtained, try using the procedure described in the SMARTPHONE - TABLET - WEB chapter or contact the ASSISTANCE.

## ENTERING THE CODE DIRECTLY

(only to be performed if you know the **specific code** to be set)

- On the MELICONI remote control [select the operating mode](#) and then press and hold the  button until the LED lights up; release.
- Immediately enter the previously identified specific code.
- Three final flashes indicate that the operation has been completed successfully.

If the remote control does NOT carry out the three final flashes, the setting is NOT successful; repeat the procedure. If still unsuccessful, it means that the code is not included in the remote control, contact the ASSISTANCE.

## DELETE FUNCTION BY SINGLE BUTTON

If you want to delete the function in combination with a single button, operate as follows:

- On the MELICONI remote control [select the operating mode](#) and then press and hold the  button.
- When the LED turn on, **without releasing the**  **button**, enter the code **1600**; release the buttons.
- Within 30 seconds, press and hold the button of which you want to delete the function; wait three flashes indicating the end of the operation, release the button. (to recall the original function, setting again the activation code)

## BUTTONS AND FUNCTIONS

The functions of the buttons on the MELICONI remote control are only available if the original device is equipped with it. Sometimes some functions of the original remote control are not directly present on the MELICONI remote control keypad. To enable them, connect to the [www.cme.it](http://www.cme.it) page, use the on-line tool ACTIVATION OF REMOTE CONTROL and continue until you see the list matching buttons between the original remote control and the MELICONI remote control. If the function you want to play is matched with a number in **orange** color, operate as follows:

- On the MELICONI remote control [select the operating mode](#) and then press and hold the  button.
- When the LED turn on, **without releasing the**  **button**, point the remote control towards the device and enter the previously identified number corresponding to the function you want to get. (at the last digit pressure, the remote control already transmits this function)
- Release the buttons; to match the function obtained to a MELICONI remote control button, within 30 seconds, press and hold the desired button.
- Wait three flashes indicate that storage; release the button. (the used button loses the original function that will be called by setting again the activation code)

## MEMO FUNCTION

The MEMO function allows you to record a sequence of functions (button) and combine it with a single call button. Sometimes it is necessary to perform different operations in succession in order to obtain a certain result. With MEMO function will be possible to automate a number of functions (also on different devices) without having to remember and repeat every time you need.

The MEMO function records the pressure of a maximum of **31** buttons, (including possible changes of operating mode) also memorizing the pressure time and issue of the buttons.

Any button, except the  button and the device selection buttons, can be used to record a MEMO function; obviously the preset function on the button will be lost, but it can be restored by setting again the activation code.

To recall a MEMO function, press the button to which was matched, the remote control will play the entire sequence memorized ignoring any other command until its end.

You can not create recursive or nested MEMO (MEMO functions that call other MEMO)

More MEMO functions can be recorded in the various remote control operation modes, up to maximum total of **8**.

The recording of MEMO function can be repeated many times until the desired result is obtained, moreover the sequences captured are kept in memory even with dead batteries or removed.

### • MEMO RECORDING

- On the MELICONI remote control [select the operating mode](#) and then press and hold the  button until the LED lights up; release.
- Press the  button again briefly and immediately press for a moment the button to which to combine the MEMO function.
- At this point the remote control is ready to record the desired button sequence; press in order the buttons to memorize with the normal rhythm used to command the relative devices.
- To terminate the record procedure, press and hold  button, wait three flashes indicate that storage; release.

From now when the designated button is pressed, the MELICONI remote control will automatically reproduce the sequence of buttons memorised.

Reached the number of records available, the dedicated memory becomes full, preventing further use.

To free memory use one of the following procedures in relation to the data that you want to delete:

- DELETE FUNCTION BY SINGLE BUTTON
- ENTERING THE CODE DIRECTLY
- RESET THE REMOTE CONTROL

## DISPLAY CODE IN USE

For any future activation of the remote control, it is advisable to extract and note the code in use, operate as follows:

- On the MELICONI remote control [select the operating mode](#) and then press and hold the 
- Enter the code **0010**.
- After a pause of several seconds, the LED produces four sets of flashes, spaced out, corresponding to the code to be obtained. Count the number of flashes. Each set of flashes corresponds to one digit in the code. Ten flashes correspond to the digit zero "0".  
(**example code obtained = 1701**)
- Make a note of the code obtained. You may need it in future.

## TROUBLESHOOTING (F.A.Q.)

### ! ATTENTION! !

**Most problems are caused by using insufficiently charged batteries.**

We recommend checking and replace them as shown in the INSERTING THE BATTERIES chapter.

#### • IF THE REMOTE CONTROL IS NEW AND YOU CAN NOT MAKE IT WORK

It is possible that the code set in the remote control is incorrect for the device that you want to control. Check that you have carried out all the settings procedures correctly. If necessary repeat them, following all the steps indicated carefully. Consult the website [www.cme.it](http://www.cme.it) to identify the specific code associated with your device or contact the ASSISTANCE.

#### • IF THE REMOTE CONTROL IS NO LONGER ABLE TO CONTROL THE DEVICE

Disconnect the device from the electric socket and leave it without power for a few minutes; switch the device on again.

Remove the batteries from the remote control, press the **ON/OFF**  button twice and insert NEW batteries.

Make sure that the remote control is pointing at the device without any obstacles between them.

When pressed (even unintentionally) one of the selection buttons, you put the remote control to command a certain type of device.

Be sure to operate in the mode corresponding to the device to be controlled; [select the correct operating mode](#) and check if the remote control resumes working.

If necessary try to the **RESET OF THE REMOTE CONTROL** and carry out a new activation.

#### • IF SOME FUNCTIONS ARE NOT AVAILABLE ON THE REMOTE CONTROL

Usually the MELICONI remote control makes available only the present functions on his keyboard, provided they are available also on the original remote control.

If some of the MAIN functions are not available, you are probably using an incorrect code. Find and set a more suitable code as described in the **ACTIVATION OF REMOTE CONTROL** chapter.

Sometimes some functions of the original remote control are not directly present on the MELICONI remote control keypad.

To enable them, operate as described in the **BUTTON AND FUNCTIONS** chapter.

#### • HOW TO CHECK IF THE REMOTE CONTROL SENDS INFRARED SIGNALS

The human eye is not able to detect infrared signals; use a camera (even that of the mobile phone).

Aim the infrared LED located in front of the remote control (not the red LED above) and press and hold on the remote control the **5** button.

If you see through the camera, the LED light with short white / light blue flashes means that the remote control works and emits infrared.

## RESET THE REMOTE CONTROL

If necessary it is possible to **completely** reset the remote control and bring it back to the initial conditions.  
**WARNING** : All user settings will be lost. Operate as follows:

- On the MELICONI remote control press and hold the  button until the LED lights up; release.
- Enter the code **0100**.
- Three final flashes indicate that the operation has been completed successfully.

## ASSISTANCE

The symbol showing a wheeled bin with a cross through it which appears on the device indicates that at the end of its useful life the product must be collected separately from other waste. Therefore, at the end of the device's life, you must take it to appropriate centres for the differentiated collection of electrical and electronic waste, or return it to the retailer when purchasing a new device of equivalent type. Suitable differentiated collection to allow subsequent recycling of the decommissioned device, with environmentally-compatible treatment and disposal, help to prevent any negative effects on the environment and health and to promote the recycling of the materials of which the device is made.

**CAUTION:** Batteries must not be disassembled, thrown into fire or released into the environment. Improper use can cause damage to the environment and health. The symbol of the bins, indicating that the batteries should be disposed of according to current regulations; inquire on collection of spent batteries and accumulators in force in your country.
